COSMETIC DERMATOLOGY OF ASMC COMPRISES OF THE FOLLOWING SERVICES AND MACHINES

1 Quantity HIFU machine

HIFU is a relatively new and painless cosmetic treatment that offers an alternative for the invasive face-lift. The ultrasound energy encourages collagen production which results in firmer skin, meaning less time worrying about your wrinkles

2 Quantity OXYGENEO machines

3 in 1 therapy Oxygeneo is a facial treatment for skin exfoliation, improving your skin oxygen levels and infusing it with valuable ingredients. Delivers 3 essential skin-renewing treatments simultaneously:

1 Quantity Red Carpet Facial machine

Mesotherm Biotec Italia Mesotherm is a multifunctional skin treatment that can effectively treat wrinkles, hyperkeratosis, acne and enlarged pores. It also tackles thickened skin issues such as scars or stretch marks.

6 Quantity Laser Dermatology machines

If you are looking for the excellent dermatologist in Al Ain, Abu Dhabi, then look no further than Arabian Specialist Medical Centre. We offer a wide range of laser services including hair removal and skin rejuvenation.

2 Quantity PRP Face / Scalp for Hair Loss Treatment

PRP (Platelet Rich Plasma) for Hair Loss is now the latest trend in hair regrowth and hair loss treatment. Each Patient's needs and life factors vary, resulting in different treatment plans per person. On average we find that three treatments of PRP, separated 4-6 weeks apart will provide initial results. Pairing PRP with healthy lifestyle choices and topical/oral products can help enhance result.

1 Quantity Laser Skin Resurfacing with Fractional Laser machine

The latest in non-ablative, fractional laser technology, the fractional laser is able to effectively and efficiently treat conditions such as dark spots, acne scars, stretch marks, wrinkles, and more. The term non-ablative refers to the way in which the treatment does not destroy or ablate skin cells, and fractional means that only a certain percentage or fraction of the skin is affected. With laser skin resurfacing treatment with fractional laser patients can achieve fantastic results with minimal downtime.

1 Quantity Laser Vein Treatment (Excimer) machine

There are several important benefits that come with laser vein therapy. Laser vein treatment also requires little to no downtime. You can return to your normal daily activities the same day. At the worst, some areas may require compression stockings after treatment, and it's wise to try and protect the treated areas from the sun for a few days.

1 Quantity G. CELL MACHINE

simplifies the process of harvesting and isolating adipose-derived stem cells. At a size that makes it ideal for the corner of any procedure room, it is able to do the job of four machines in one- a grinder, a photoactivation device, and a centrifuge. While using the machine, all a physician has to do is program the machine and wait for it to produce a fully administrable sample of stem cells.

2 Quantity ELECTRO CAUTERY machine

This is done with an electrical charge sent through the tip of a needle, drying and burning off the wart tissue. The skin around the wart must first be numbed with a painful local anaesthetic injection. Electrosurgery can be used for a single wart ora few warts but not for large areas of warts.

1 Quantity CRYO GUN Unit

Cryotherapy involves freezing a wart using a very cold substance (usually liquid nitrogen). Cryotherapy is a standard treatment for warts and can be done in a doctor's office. The liquid nitrogen application usually takes less than a minute.

1 Quantity SECRET RF machine

skin revitalization and resurfacing microneedling system that uses radiofrequency to improve the fine lines, wrinkles, and scars from the inside. Secret RF induces dermal remodeling by applying precisely controlled RF energy directly into various.

1 Quantity DERMATOSCOPE Unit

Dermascopy is performed with a handheld instrument called a dreamascope. The procedure allows for the visualization of subsurface skin structures in the epidermis, at the dermo epidermal junction, and in the papillary dermis; these structures are usually not visible to the naked eye.

3 Quantity HYDRA FACIAL machines

1 Basic hydra facial machine ,2-Aqua Pure (Advanced) hydra facial machine ,3- Royal hydra facial machine

1 Quantity OLIGO SCAN UNIT

To scan vitamins mineral and trace elements.

1 Quantity ECG Unit

2 Quantity OPG Units

1 Quantity ULTRASOUND Machine

1 Quantity -FOTONA SMOOTH (Cosmetic Genecology)
